
HB ONE™
BACKER CI
THE BOARD That Changes Everything.

HB ONE™ | BACKER CI

HB One Backer CI is the board that revolutionizes the installation of stucco and stone, a true **4-IN-1 system** combining the Secondary WRB, Insulation, Lath, and Scratch Coat into one high-performance board.

HB One Backer CI reduces steps, cuts costs, shortens schedules, and delivers Continuous Insulation for a faster, cleaner, and dramatically more predictable **Direct to Board** Stucco finish.

4-IN-1 System

Backer CI delivers a 4-IN-1 system with zero compromise, combining the secondary WRB, insulation, lath and scratch coat into one high-performance board, making stucco installation easier and more efficient.

XPS Foam

Our boards leverage the highest quality XPS foam to deliver higher R-Value, improved durability, and the confidence of a proven material with decades of performance heritage.

Energy Code Compliant

True continuous insulation to minimize thermal bridging while meeting today's evolving energy codes.

Contractor Care

Built to save contractors time, reduce on-site labor, and simplify the stucco installation process, making every job easier and more predictable.

LABOR SAVINGS

Cost Effective:
Labor savings of 20-35% help builders save cost and beat deadlines.

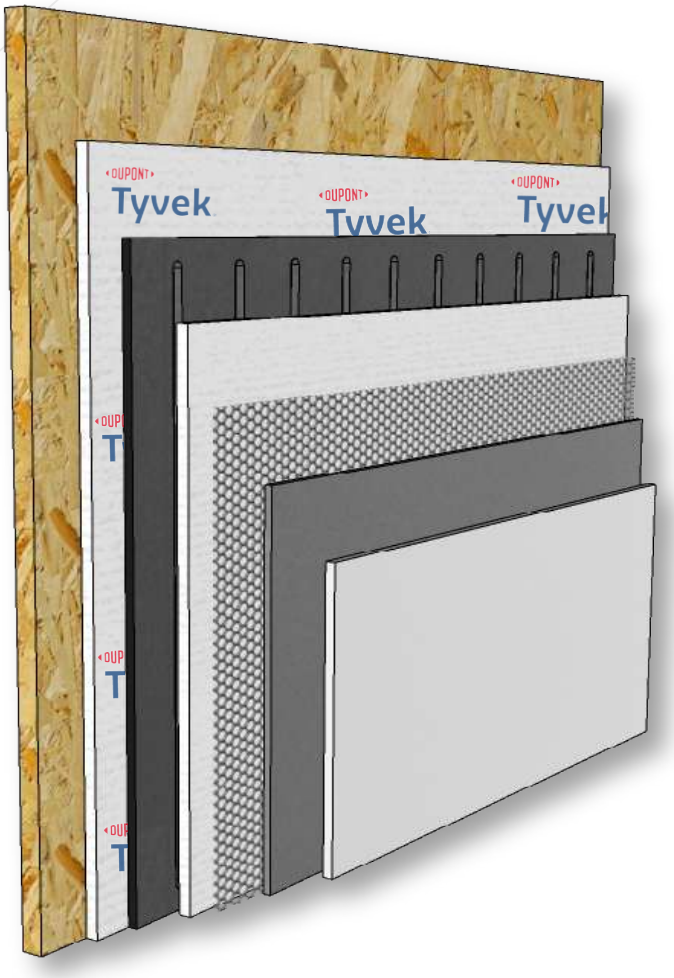

Energy Efficiency & Airtightness:
When sealed with an approved polyurethane sealant or tape, Backer CI creates a continuous vapor and air barrier that maximizes insulation performance, reduces drafts, and improves overall energy efficiency.

Sustainability:
HydroBlok One Backer CI is manufactured using eco-friendly and recyclable materials, free of CFCs and HCFCs. It's lightweight nature reduces transportation emissions, and it's high thermal efficiency contributes to reduced energy consumption in buildings.

HydroBlok One Backer CI Sizing and Specifications

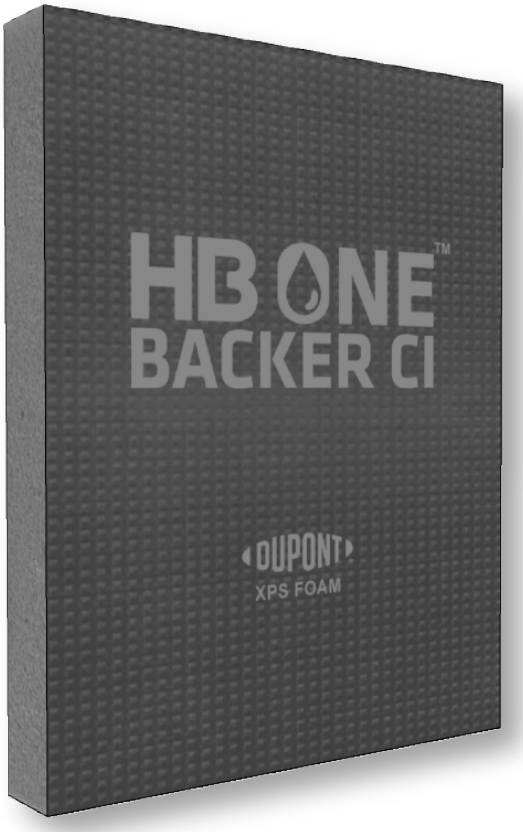

HydroBlok One Backer CI Specifications:		
Available Sizing:	**Weight:**	**Pieces Per Unit:**
4’ x 8’ x .5”	23 lbs	88 pcs
4‘ x 8’ x 5/8“	25 lbs	80 pcs
4’ x 8’ x 1”	28 lbs	44 pcs
4‘ x 8’ x 1 1/8”	29 lbs	40 pcs
4’ x 8’ x 2”	36 lbs	22 pcs

Backer CI boards ensure energy efficiency with continuous insulation, along with a constant air and water-resistive barrier. Reinforced base coat and acrylic polymer finish applied to the mold and moisture resistant XPS insulation panel offers design flexibility, aesthetic appeal and energy savings.

For exterior walls in new or retrofit commercial and residential construction, boards can be installed in any air temperature and can also be panelized to accommodate year-round off-site and near-site construction.

The high-performance exterior wall solution engineered to deliver significant labor savings and superior Continuous Insulation (CI). Built for the "One Coat" and EIFS markets, HydroBlok simplifies the building envelope by replacing complex traditional layering with a single, energy-efficient, and waterproof system.

HydroBlok One Backer CI bridges the gap between high-performance building science and real-world construction efficiency.

Modern Disruption Starts With HB ONE Backer CI

With moisture failures driving most exterior envelope lawsuits, and builders squeezed by labor shortages and rising costs, HB ONE Backer CI delivers the answer. It's a true 4-IN-1 System, slashing risk, labor, and complexity, giving builders a faster, cleaner, and far more reliable way to build.
